Professional Qualification Trainings

ReScape's nature-based Qualification Trainings, led by experts, offer subject area hands-on modules and discussions, group activities, and field training. Designed for professionals in landscaping, the course promotes regenerative best practices aligned with our 8 Principles, supporting regional watershed integrity. Completing the course, participants take a qualifying exam and gain eligibility for a business listing in our ReScape Qualified Directory.

Certification Trainings

Certifications for ReScape Qualified Professionals, led by local experts, offer interactive lectures, hands-on activities, and in-depth study of specific subjects or ReScape Principles. These workshops provide targeted technical support on tools, skills, regulations, or landscaping issues. ReScape Certification, earned through an exam, is listed in ReScape's Professional Directory.

Scholarships are available: Contact Ryne De Ocampo: info@rescapeca.org

ReScape advocates for a regenerative, whole systems, approach to landscaping education and advocacy, addressing earthscape climate change issues. ReScape's landscaping practices are based on 8 regenerative principles, which foster soil health, sequester carbon, conserve water, and protect habitat and valuable resources as well, reducing waste and preventing pollution in our communities and watersheds.
